OPERATION DEVILISH SCHEMES

FICTIONAL: Plan to steal, kill & destroy young black lives

www.dontdieyoungcares.com

MISSION

Operation Devilish Schemes is a comprehensive long-term plan targeting black men to keep them disconnected from realizing their God ordained identity and purpose for their lives. We recognize that some black men will dedicate their living to biblical principles, however, our goal is to consume a high percentage of black males to cause generational confusion, hate, fear and divisiveness. To destroy the lives of black men, it will be important to first target black boys so they grow into angry or depressed black men.

To achieve hell's mission of sowing confusion, hate, fear and divisiveness in the world, we will target skin color and gender. Because the bible calls for men to serve as the heads of their families and communities, we will go after black men by working to not only devalue them, but to cause them to subconsciously feel devalued within themselves. It's not enough to influence evil intentions towards our targeted group, we must ensure that black men unknowingly accept our deception.

MISSION

(continued)

To be successful in this effort, we will need to influence people of all skin colors to embrace attitudes, policies and laws that cause black men to feel less-than human. Starting from a very young age, black boys need to be exposed to oppressive environmental conditions that result in a hovering dark cloud of insecurity and pessimism. To achieve our mission of devaluing black men, Operation Devilish Schemes will stand on the following 5-Pillars to steal, kill and destroy:

Pillar #1 - Self Worth

Pillar #2 – Frustration

Pillar #3 – Discouragement

Pillar #4 – Anger

Pillar #5 – Depression

Each of the above listed pillars must be implemented in a way that will compromise the thoughts, feelings, emotions and mind-set of black boys – their Souls!

5 Pillars

To Steal, Kill & Destroy

Pillar #1 – Self Worth

Strategy: To influence vulnerable souls of all skin colors to create conditions in the world that sows racism/questions of doubt into the value of black men. Ultimately, if we can make sure that young black boys are constantly exposed to lies about their worth and what's wrong with them, it will eventually become a self-fulfilling prophecy about their value as black men when they are older.

Pillar #2 – Frustration

Strategy: Establish a consistent barrage of misinformation about black boys that results in this group becoming frustrated. Frustration is fertile ground to be discouraged which can lead to anger.

Pillar #3 – Discouragement

Strategy: With the sustained barrage of environmental conditions that will frustrate black boys, we expect this burden to move them further away from the true purpose for their lives and into a state of discouragement.

5 Pillars

To Steal, Kill & Destroy

Pillar #3 *(continued)*

We need black boys to begin believing that these persistent negative environmental conditions will never change and to embrace and weaponize this frustration.

Pillar #4 – Anger

Strategy: Surround black boys with unrelenting discouragement so that they not only begin to feel anger and resentment, but that this anger will be placed on the people closest to them – their own kind.

Pillar #5 – Depression

Strategy: Deepen the anger of black boys to further separate them from the vision and promises for their lives. At this stage, black boys are expected to reach a state of depression that they will not acknowledge or accept. Instead of being offered healing, Operation Devilish Schemes will influence black boys to resist the idea of depression by re-defining rules to live by which will align with an acceptance of violence.
